

The Hispanic American Market Report: Understanding The New American Mainstream

Part 3 – April 2019

The face of America is changing, and multicultural consumers already represent the majority of the expected growth in the United States now and in the future.

In this third report of the Claritas New American Mainstream series, we'll identify the Hispanic American segment in great detail, specifically their population growth, household income and cumulative lifetime spending within key categories.

Currently, more than 64 million Hispanics live in the United States, making this group the second fastest-growing population segment since 2000, with 83% growth.

Continue reading to understand why this is a group that marketers can't afford to ignore.

Numbering over
64 million in 2019,
Hispanics represent **19.5%**
of the U.S. population and
are the second fastest-
growing population
segment since 2000.

U.S. Hispanic 2019 Population Facts

Currently, there are 133,211,770 multicultural Americans in the U.S. and they account for 37.5% of the U.S. population.

In addition, Hispanics account for the largest multicultural segment at 19.5%, and are the second fastest growing ethnic group since 2000, with 83% growth.

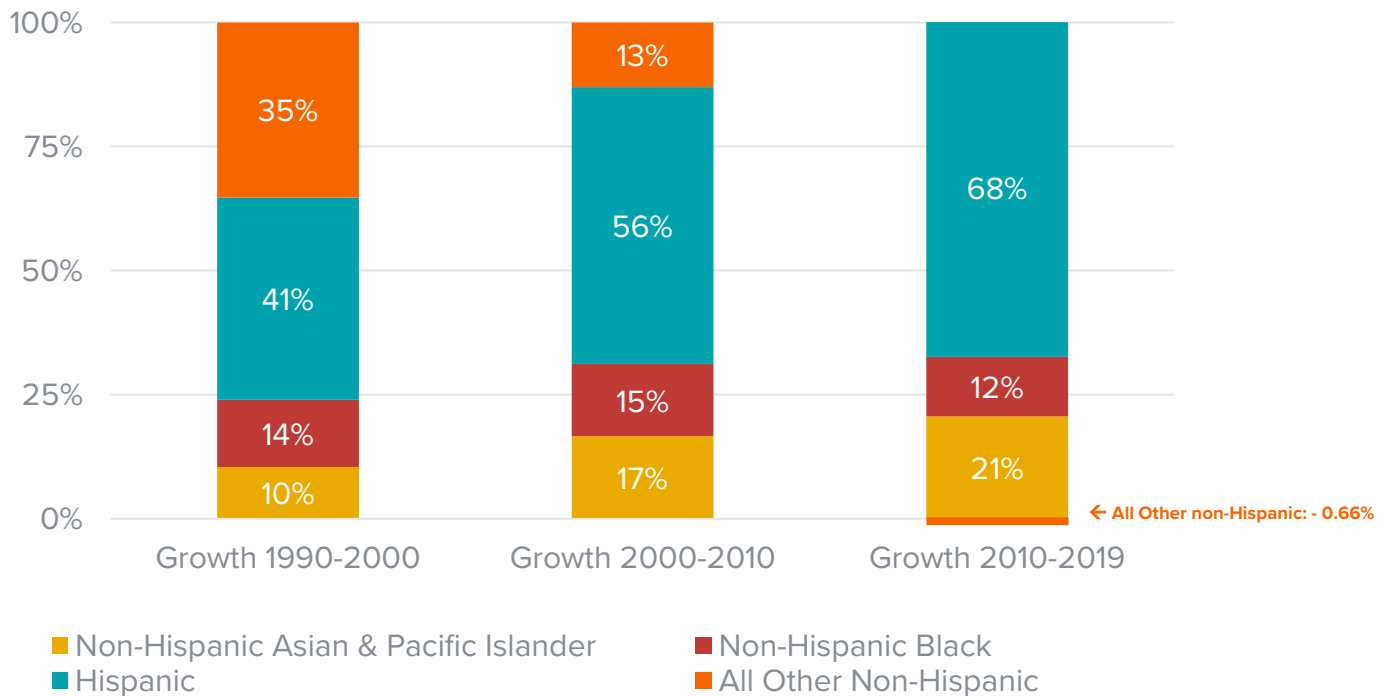

- Non-Hispanic All Others
- Non-Hispanic Black
- Non-Hispanic Asian & Pacific Islander
- Hispanic

Since 2000, Hispanic Americans represent the second fastest growing ethnic group at 83%.

Population Growth 1990-2019

Source: U.S. Census Bureau for 1990-2010 and Geoscape AMDS 2019

The Hispanic population grew 83% from 2000-2019, expanding from over 35 million to over 64 million.

Today, 64,415,826 Hispanics live in the United States. Hispanics have been the second fastest-growing population segment since 2000, showing 83% growth. Virtually all of the growth now and into the foreseeable future will emanate from groups other than the traditional “majority” Non-Hispanic White population.

Growth During 20 Year Period 2000 - 2019

Multicultural Group	Population Growth	Growth During 2000-2019	% of Total Growth
Non-Hispanic Whites	1,510,265	0.8%	3.2%
Hispanics	29,177,345	83%	61%
Non-Hispanic Blacks	6,443,658	19%	13%
Non-Hispanic Asian & Pacific Islanders	8,758,829	84%	18%

Into the Future: The Multicultural Boom 2019 - 2024

Nearly all of the U.S. population growth since 2000 has come from multicultural segments, and that trend is likely to continue in the future. The Hispanic population continues to show significant growth, thus representing one of the biggest opportunities for marketers to grow their businesses in the future. The Non-Hispanic white population is declining steadily as baby boomers age and fertility rates remain low.

Multicultural Group	Average Growth in Population 2019-2024			
	Year	Month	Day	Hour
Non-Hispanic Whites	-60,156	-5,013	-165	-7
Hispanics	1,536,315	128,026	4,209	175
Non-Hispanic Blacks	315,492	26,291	864	36
Non-Hispanic Asian & Pacific Islanders	483,004	40,250	1,323	55

Source: U.S. Census Bureau for 1990-2010 and Geoscape AMDS Projections for 2019-2024.

By 2024, more than **72 million** Hispanic Americans will live in the United States.

Hispanics and Asians are becoming a larger portion of our nation’s population. The Black population is growing, but is nearly constant as a proportion of the total population. Meanwhile, the Non-Hispanic White population proportion has been declining steadily as a proportion of overall American population.

Percent of the U.S. Population: 1990-2024

Source: U.S. Census Bureau for 1990-2010 and Geoscape AMDS Projections for 2019-2024.

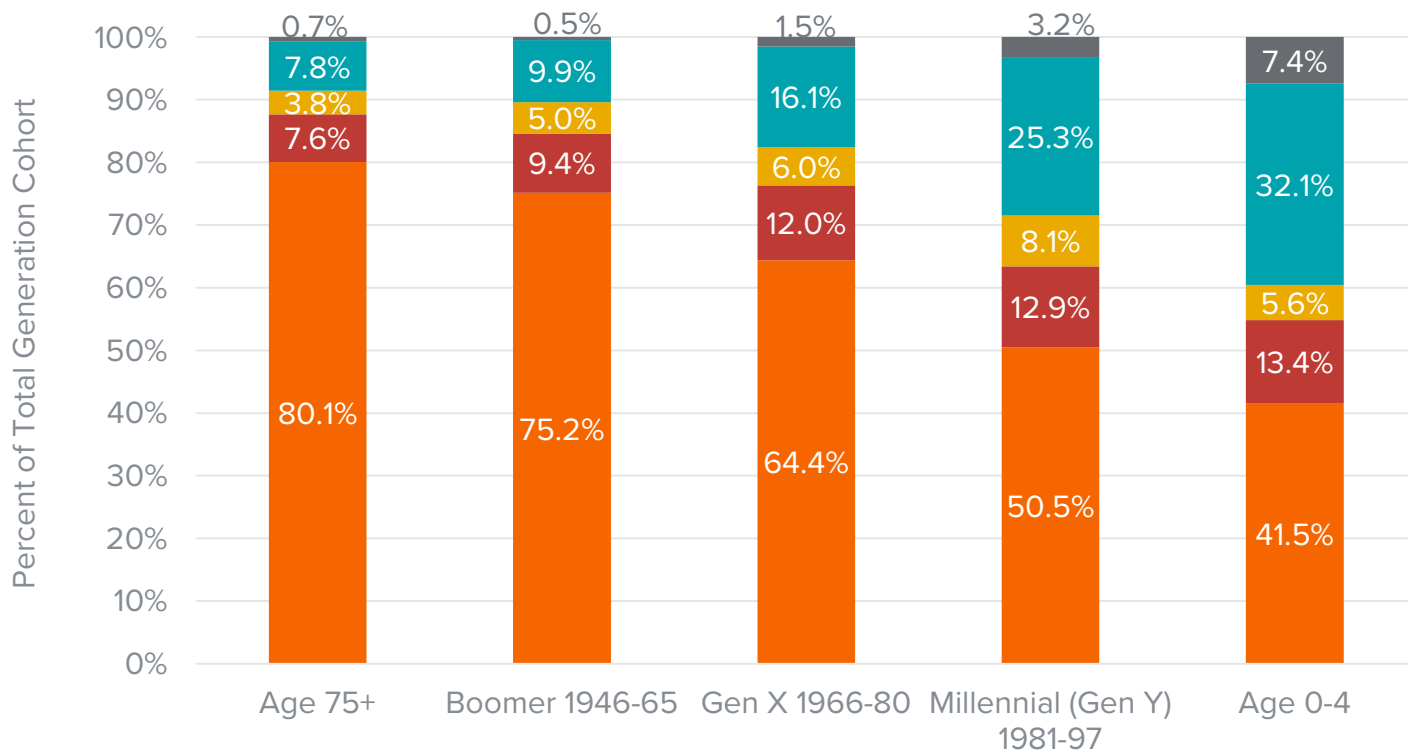

By 2024, 25.3% of the U.S. millennial population will be Hispanic.

Younger age groups are made up from a more diverse population, while older age groups tend to be less diverse. This dramatic trend in ethnicity by generation will have deep implications for marketers in the years and decades to come.

Generational Population 2024 - Nationwide

- Non-Hispanic Other
- Hispanic
- Non-Hispanic Asian
- Non-Hispanic Black
- Non-Hispanic White

Where Does the Hispanic Population Live?

The Hispanic population segments are concentrated in Los Angeles, New York, Houston, Miami, Dallas, Chicago and San Francisco. Their presence in many other areas is growing as well, with significant growth in Phoenix, San Antonio, Sacramento, and San Diego. On a percentage basis, very strong growth is seen in the southeastern states.

The Average U.S. Hispanic Household Makes \$69,468

Compared to the overall 2019 median annual household income, the median Hispanic household income is the second lowest ahead of Blacks, and followed by Whites and Asians. Median Hispanic household income is 14% lower than the total U.S. household. Average Hispanic household income in 2019 is \$69,468.61, which is 19% lower than the overall household income and 66% lower than Asian household income. This is partly due to their younger ages as well as their tendency for employment in lower earning jobs.

Population	HHs	Median HH Income	Mean HH Income	Aggregate HH Income
Total	125,018,808	\$60,194	\$85,710.10	\$10,715,375,124,299
White	94,015,753	\$70,727	\$94,990.84	\$8,930,635,153,323
Black	15,506,334	\$43,966	\$61,376.06	\$951,717,660,040
Asian & P.I.	6,230,709	\$91,414	\$116,319.15	\$724,750,796,367
Hispanic	17,589,124	\$51,747	\$69,468.61	\$1,221,892,028,115

Diversity of Hispanic Americans

Hispanicity™ is a Geoscape® CultureCode® measuring the degree to which people of Hispanic heritage in the United States retain elements of their Hispanic culture while they acquire elements of the American culture. Hispanicity can be dimensionalized by various characteristics, including country-of-origin, life stage, socioeconomic strata, income, media usage and a variety of shopping behaviors. Hispanicity can also be appended to a customer file or list used for traditional direct marketing or for digital advertising. The result is an unprecedented level of detail that enables marketers to understand the dynamics of the diverse American consumer and market to them more effectively.

Hispanicity Acculturation Segments for Hispanic Population 2019

17.1%

Americanizado

HA1

English dominant (nearly no Spanish); Born in US; 3rd+ generation. Few Hispanic cultural practices.

Tendencies:

- Watches MTV2 & VH1
- Watches UFC on TV
- Single-never married
- Work in tech
- Shop at Whole Foods

29.2%

Nueva Latina

HA2

English preferred (some Spanish); Born in U.S.; 2nd generation. Some Hispanic cultural practices; often “retro-acculturate”.

Tendencies:

- Students
- Works in Office & Administrative Support
- Watches Universo & Telemundo
- Shops at Sam’s Club

25.8%

AmBi-Cultural

HA3

Bi-Lingual (equal or nearly); Immigrant as child or young adult. Many Hispanic cultural practices.

Tendencies:

- Lives with parents
- Boxing fans
- Attends U.S. Soccer Games
- Shops at Walmart

15.3%

Hispano

HA4

Spanish preferred (some English); Immigrant as adult; in U.S. 10+ years. Pre-dominant Hispanic cultural practices.

Tendencies:

- Blue collar
- Largest families
- Late-night Spanish TV
- Watch Mexican Soccer League

12.6%

Latinoamericana

HA5

Spanish dominant (nearly no English); Recent immigrant as adult (less than 10 years ago). Primarily Hispanic cultural practices. Identify with home country more than U.S.

Tendencies:

- Least educated
- Migrant laborer
- Shop at Hispanic Grocery
- Lowest internet usage

Hispanic Households Spend About 5% More Annually on Apparel and About 1.4% More Annually on Food at Home Than the Average U.S. Household

Due to a lower disposable income, Hispanic American households spend less overall annually on consumer goods and services than the average U.S. household. However, there are some spending categories where Hispanics spend more than the average U.S. household annually.

For example, Hispanics spend roughly \$2,300 annually on apparel – 5% more than the average U.S. household for all apparel sub-categories, including men’s, women’s & children’s clothing & footwear. Hispanic households also spend \$4,740 annually on food at home – about 1.4% more than average U.S. households.

In addition, Hispanic American households also spend:

- 21% more on Men and Boys Apparel than average U.S. households
- 25% more on Men’s Active Sportswear than average U.S. households
- 28% more on Apparel for Children Under 2 than average U.S. households
- 28% more on Footwear for Men, Boys, Women and Girls
- 17% more on Soaps, Detergents & Other Laundry and Cleaning Products.
- Also, within the Food at Home category, not only do they spend 15% more on meat and eggs, they also spend 9% more on fruits & vegetables

Transportation

Hispanic HHs spend 15% less on vehicle services (lube, oil change) and 13% less on tune-ups. However, Hispanic households spend > 18% more than the average household on motor oil and > 9% more on coolant, additives, brake and transmission fluids – indicating that Hispanics are purchasing these products directly and servicing their own vehicles, rather than paying a service provider (e.g. garage etc.) to perform maintenance on their vehicles.

This makes Hispanics an excellent target group for automotive aftermarket retailers and for manufacturers of motor oil & other vehicle parts & fluids.

About Claritas

Claritas helps companies **identify** customers. Not just any customers – their best customers. We help engage and **deliver** those customers when and where they want to be engaged. And finally, we help clients **optimize** those engagements with remarkable transparency and precision in near-real-time.

Our tools and data define who your best customers are, how they behave, and how to connect with them. With powerful original research, trusted data partnerships, and an expert analytics team, we provide the why behind the buy that is the key to selling smarter and winning bigger.

Targeting the New American Mainstream

To capture multicultural growth opportunities, you must first understand them: their likes, dislikes, preferences, behaviors, etc. These insights let you create personas, tailor messages and promotions specific to their wants and needs. Marketers leverage Claritas' deep understanding of multicultural segments, using tools, such as Geoscape CultureCodes across local, national and digital markets for smarter targeting, smarter planning and smarter buying to help drive bigger profits.

Multicultural Insights to Shape a Smarter Plan

Data from Geoscape American Marketscape Datastream (AMDS) can be applied to a wide variety of situations and challenges using computerized applications, such as the online Geoscape Intelligence System (GIS). Some of the applications are listed below.

- Strategic Planning
- Market Potential Assessment
- Product Development & Positioning
- Database mining & modeling
- Retail Site Selection & Distribution
- Marketing Communications & Media Planning
- Promotions & Direct Response
- Market Research: Surveys, Focus Groups, etc.
- Industry specific intelligence applications
- Sales potential and forecasting
- Consumer segmentation and targeting
- Customer relationship management
- Investment Valuation
- Public & Social Services
- Budget Allocation
- Staffing
- In-store experience management
- Retail shelf-space planning
